<p>Padlet <i>For Teachers</i></p>		<p>Padlet is a free tool that allows you to create and share virtual “walls”. It is one of the most popular educational apps. It allows anyone to publish/share content, individually or collaboratively. To do so, Padlet offers a minimalist service: an empty space or “wall”, and a tool to insert multimedia content (text, images, videos, audio files, links)</p>	x		<p>https://www.techlearning.com/how-to/what-is-padlet-and-how-does-it-work-for-teachers-and-students</p>	iOS and Android	x	
<p>Linoit <i>For Teachers</i></p>		<p>Linoit: Online service that allows you to post stickers on digital bulletin boards. You can affix, display and highlight stickers freely on your screens. The stickers published by this application for</p>	x		<p>https://en.linoit.com/</p>	ios	x	x

		iPhone/iPad are accessible from the computer.						
Scrumblr For Teachers		Scrumblr: Platform that offers an online space to create and share sticky notes collaboratively. It can be used by anyone to quickly create an online space for sharing these stickers.	x		http://scrumblr.ca/	iOS and Android	x	
Stormboard For Teachers		Stormboard Allows the creation of an unlimited number of digital boards, on which up to five collaborators can work. Each of your boards can include sticky notes, images, videos, drawings and documents. Moving objects is a simple drag and drop process	x		https://stormboard.com/home	iOS and Android	x	
Live Worksheets For Teachers		Live Worksheets allows you to transform your traditional printable worksheets (docx, pdf, jpg...) into interactive online exercises, with self-correction, which	x		https://www.liveworksheets.com/	iOS and Android		

		can be called “interactive worksheets”. That is, exercises designed to be printed can be turned into computer/tablet exercises.						
KAHOOT! For Teachers		It is a learning platform in the form of interactive games, used for educational purposes in schools and other educational institutions. Its learning games are multiple-choice quizzes that can be written by users and are accessible through a web page or through the “Kahoot!” application. It is suitable for students to play games, and it also allows you to productively incorporate lessons in video format. The free version of “Kahoot!” it has a limited number of options but is suitable	x		https://kahoot.it/	iOS and Android	x	

		for use by teachers and students.						
QUIZZZ For Teachers		QUIZZZ - software used in class, group work, pre-test review, formative assessments and questionnaires.	x		https://quizizz.com/join	iOS and Android	x	
WIZER.ME For Teachers		WIZER.ME – free tool that allows teachers to create their own interactive materials (evaluation, questionnaires, worksheets, etc.).	x		https://app.wizer.me/	iOS and Android	x	
ZAC Browser		ZAC Browser, a browser for autistic people.		x	https://zacbrowser.com/	iOS and Android	x	x
ARASAAC		ARASAAC offers graphic resources and materials adapted under a Creative Commons license (BY - NC - SA) to facilitate communication and cognitive accessibility to all people who, for different reasons (autism, intellectual disability, lack of language, age, etc.),	x		https://arasaac.org/	iOS and Android	x	x

		have serious difficulties in these areas that prevent their inclusion in any domain of everyday life.						
netboard		netboard: Simple and free online tool to collect, organize and share any content. Allows you to create web pages with texts, links, documents, videos, photo slideshows and other content.	x		https://netboard.me/	iOS and Android	x	
pictoworld		Symbol library, has more than 2,500 symbols. The symbols are arranged in alphabetical order.			https://pictoworld.com/	Windows	X	
widgit		Widgit Symbols are used around the world to support people and help them realize their full potential, regardless of their age, ability or background.	x	x	https://www.widgit.com/	ios/windows	x	
PECS		The Picture Exchange Communication System (PECS) is a system augmentative		x	https://pecs-canada.com/pecs/	iOS/Windows	x	x

		<p>and alternative communication.</p> <p>Although PECS was originally developed for children with autism spectrum. Over the years, PECS has been successfully implemented in individuals with a variety of diagnoses.</p>						
Makaton		<p>Makaton is a unique language program that uses symbols, signs and speech to allow people to communicate. Supports the development of essential communication skills such as attention and listening, comprehension, memory, recall and organization of language and expression.</p>	x	x	https://makaton.org/TMC/About_Makaton/What_is_Makaton.aspx	iOS/Wind ows	x	x

<p>Duckie Deck Huff n' Puff</p>		<p>Very simple app with just a background image. The activity consists of interacting with the image through blowing. When blowing something happens in a contextualized way with the image.</p>		<p>✓</p>	<p>https://appadvice.com/app/duckie-deck-huff-n-puff/821551481</p>	<p>iOS</p>	<p>✓</p>	<p>✓</p>
<p>switchtrainer</p>		<p>Basic cause-and-effect exploration application with switch. Allows you to introduce two switches and make different types of settings, such as switch triggers the activity of the application or switch triggers turning to next and previous activity and the activity itself is triggered by direct touch. The activities are simple but with background scenarios, which are not very complex and can be too much information for some students.</p>		<p>✓</p>	<p>https://www.leonardoausili.com/riabilitazione/480-switch-trainer.html</p>	<p>IOS/ WINDOWS</p>	<p>✓</p>	<p>✓</p>

<p>Slide & Spin</p>		<p>Application that allows exploring the controlled touch, following a rule of displacement of the part. Very interesting for a more advanced level of cause and effect of touch, it requires touching a specific place and with a certain sense of orientation.</p>	<p>✓</p>	<p>✓</p>	<p>Slide & Spin on the App Store (apple.com)</p>	<p>iOS</p>	<p>✓</p>	<p>✓</p>
<p>peek-a-boo goes camping</p>		<p>Application that develops an activity similar to the game of hide and seek, where the objective is to touch the doll that hides. The character makes funny sounds and moves his hand in order to attract attention.</p>	<p>✓</p>	<p>✓</p>	<p>Peekaboo Goes Camping Game - BabyFirst (babyfirsttv.com)</p>	<p>IOS/ WINDOW S</p>	<p>✓</p>	<p>✓</p>

Find Me (Autism)

Application that explores the beginning of oriented cause and effect, requires you to identify where the boy is touching the image. It features several difficulty levels, the free version offers up to level 4. It allows progressive learning from identifying the child in simple scenarios to scenarios with moving images, requiring concentration on the objective and abstraction of distracting elements. Application in French but does not preclude its realization.

[FindMe - LearningWorks for Kids](#)

iOS

<p>find it</p>		<p>Quite simple application that can be considered cause and effect in terms of object identification and guided touch, since it requires a touch in the right place to have the desired effect. It contains only two words that are in English but do not preclude its use (hello; bye-bye). The trial version has 2 activities available.</p>		<p>✓</p>	<p>Find-It on the App Store (apple.com)</p>	<p>iOS</p>		<p>✓</p>
<p>bumper cars</p>		<p>Simple cause-and-effect application that allows the entry of 2 switches. Allowing the exploration of the activity with shifts to change the turn, but also of speed to the touch. Features two bumper cars identical to the amusement park. The car that is first triggered hits the front earning points.</p>		<p>✓</p>	<p>Bumper Cars on the App Store (apple.com)</p>	<p>iOS</p>		<p>✓</p>

		Images indicated for pre-adolescent ages, which appear on a dark background with only a score indication at the top of the screen.						
Finger Paint With Sounds		<p>App that allows you to draw by touch, features color balls that automatically select when swiping your finger. Produces sound when touched.</p> <p>Allows you to select single tap or multiple taps (with multiple fingers make multiple strokes).</p> <p>Enables the introduction of a Switch for children who are not mobile, allowing them to turn off the background sound. It has screen saver so it doesn't disconnect occasionally through two exit rings.</p>	✓		Finger Paint With Sounds on the App Store (apple.com)	iOS		✓

<p>grid player</p>		<p>Augmentative and alternative communication application that enables communication in Portuguese.</p> <p>Free application but does not allow adapting the tables, for adapting or creating tables you need the Grid computer version.</p> <p>Contains images in pictographic symbols, contains two tables, one with 15 images and the other with 24, gives auditory reinforcement of each selected word and allows the writing of the sentence, as well as its hearing when clicking on the bar of the created sentence.</p>	<p>✓</p>		<p>Grid Player on the App Store (apple.com)</p>			<p>✓</p>
---------------------------	---	--	----------	--	---	--	--	----------

<p>Communications</p>		<p>Application that allows different explorations in different activities. Features two ways of exploration, word learning and communicator.</p> <p>Word learning features a 12-cell interface that when you select an image it enlarges and you hear the voice reinforcement, it can be used to increase vocabulary and also to introduce the first written words...</p> <p>It is organized by content folders with some real images, but allows the integration of personal images.</p> <p>The images that appear on the screen are those previously selected.</p> <p>Despite being in English, it allows you to customize the word and introduce voice recording.</p> <p>Using as a communicator presents</p>	<p>✓</p>		<p>Communications on the App Store (apple.com)</p>	<p>iOS</p>		<p>✓</p>
------------------------------	---	--	----------	--	--	------------	--	----------

		<p>a one bar interface for sentence construction with 3 cells at the top of the screen, the subject, verb and object, and 9 cells of verb and object options at the bottom.</p> <p>It allows the introduction of a photo for the subject, the verbs are not customizable, and it is in English or Chinese, when selecting the verb only the words that correspond to it appear, for example eating only food appears, dressing only clothes appear, when selecting the third word, that of the object, the constructed sentence is highlighted and verbalized.</p> <p>Useful for simple communication use. (This application has a request for translation into Portuguese in the verbs part).</p>						
--	--	--	--	--	--	--	--	--

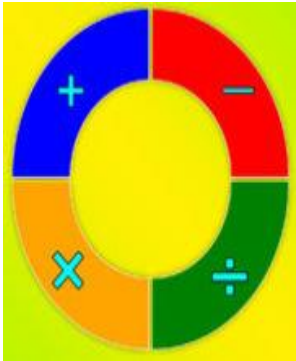

<p>image2talk - functional communication app using real images</p>		<p>Communication application with scroll bar images that run horizontally and vertically, small images. The image bars are organized by categories, with the possibility of reorganizing or creating new bars.</p> <p>The screen allows you to view 5 bars of images vertically, each bar each bar with 7/8 images visible horizontally, allowing the use of more bars with vertical scrolling or more images with horizontal scrolling.</p> <p>Contains real photos, but allows matching to the child with personal images or photographs. It has a Portuguese voice and allows you to write words in Portuguese.</p>	<p>✓</p>	<p>image2talk - functional communication app using real images on the App Store (apple.com)</p>	<p>iOS</p>	<p>✓</p>
---	---	--	----------	--	------------	----------

<p>The Fabulous Playground Animal</p>		<p>Application with 12 activities that explore basic skills such as attention, observation, quick reaction, imagination, spatial orientation, rhythmic notions and sound sequences. Explore content related to colors, animals, natural environments. It presents activities with different degrees of difficulty.</p>	<p>✓</p>	<p>✓</p>	<p><u>COMP. PRE-ESC BASE appsparaeducacao (helenafeijao.wixsite.com)</u></p>	<p>iOS</p>	<p>✓</p>	<p>✓</p>
<p>Wee Rockets</p>		<p>Application with animal puzzles. It presents two levels of difficulty, a simpler one of fitting images in the respective shadow and another with the same images but with 8 pieces. Images in nice and simple designs.</p>	<p>✓</p>	<p>✓</p>	<p><u>Wee Rockets on the App Store (apple.com)</u></p>	<p>iOS</p>	<p>✓</p>	<p>✓</p>

<p>DotToDot numbers & letters lite</p>	 <p>The icon for the 'DotToDot Lite' app. It features a pink circular badge with the word 'Lite' in white. To the right of the badge is a green number '2'. Below the badge is a pink pencil with a red eraser and a red dot at its tip. To the right of the pencil is a red number '1'. The background is light blue with a green pencil stroke.</p>	<p>Dot connection application, allows you to select whether you want to use numbers or letters of the alphabet. By connecting the dots, a drawing emerges that can be anticipated by the clues either of the sequence to be performed or of an element that appears in each image, for example a key lock. Despite being in English, you can turn off the sound and develop the activity without auditory reinforcement of the number/letter. Allows users to select difficulty levels, the lowest difficulty level is for 4-5 year olds.</p>	<p>✓</p>		<p>DotToDot numbers & letters lite on the App Store (apple.com)</p>			<p>✓</p>
---	--	---	----------	--	---	--	--	----------

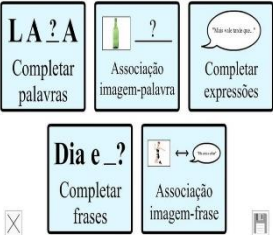

<p>ABC for kids (EN)</p>		<p>Various activities from various areas. The experimental version only includes letters, numbers and animals. The application runs even without being triggered by the child. Real pictures, not the written word.</p>	<p>✓</p>		<p>ABC for Kids (GB) on the App Store (apple.com)</p>	<p>iOS</p>		<p>✓</p>
<p>DotToDot numbers & letters lite</p>		<p>Connecting dots application, allows you to select in numbers or letters of the alphabet. By following the points, a drawing appears that can be anticipated by the clues either of the sequence to be carried out or of an element that appears in each image, for example a key lock. Despite being in English, you can turn off the sound and develop the activity without auditory reinforcement of the number/letter. Allows users to select difficulty levels, the</p>	<p>✓</p>		<p>DotToDot numbers & letters lite on the App Store (apple.com)</p>	<p>iOS</p>		<p>✓</p>

		lowest difficulty level is for 4-5 years old.						
Complete the Series 3		<p>Application that explores basic mathematical skills, relationship of sequences, in criteria such as color, shape, size and quantity.</p> <p>The free version offers two activities for exploration, the pieces always appear in different positions, avoiding memorization. Simple images with cheerful colors on a white background.</p> <p>The pack version for professionals, contains 15 applications, allows the introduction of users and makes an evaluation based on errors and successes.</p>	✓	Complete the Series 3 on the App Store (apple.com)	iOS	✓		

<p>Basic Math</p>		<p>Application in the form of a blackboard where mathematical operations appear, below are presented 3 hypotheses of response, it does not present objects to support counting. Allows you to select which operations to perform. Good answer feedback possible to view the answer. Shows positive response results in numbers and percentages.</p>	<p>✓</p>		<p>Basic Math on the App Store (apple.com)</p>	<p>iOS</p>		<p>✓</p>
<p>Bamba Ice Cream</p>		<p>Application that allows the exploration of a commercial environment, ice cream parlour. The child has to organize the space, choose the ingredients and decorations to be able to open the shop, then chooses an ice cream and decorates it, at the end he has to</p>	<p>✓</p>		<p>Bamba Ice-Cream on the App Store (apple.com)</p>	<p>iOS</p>		<p>✓</p>

		<p>pay, enter a value in the cash register and pay with coins.</p> <p>Activity that can be explored independently but which, with the support of an adult, allows exploring many areas of daily life.</p>						
<p>Book Creator Free</p>		<p>Application that enables the construction of our own book.</p> <p>It allows integrating photos, text, videos, voice recording and also drawing or writing with virtual "pencil".</p> <p>After building the book, it allows sharing it in different publishing tools such as the iTunes library.</p>	✓		<p>Book Creator One on the App Store (apple.com)</p>	iOS		✓
